NOTIZIE

Corretta la vulnerabilità critica su Firefox. Aggiornare subito il browser

20/06/2019 10:34:54

Mozilla ha corretto Type Confusion, un bug che consentiva attacchi in remoto di un'efficacia devastante.

Si trattava di una vulnerabilità zero-day che consentiva di avviare esecuzione di codice in remoto semplicemente attirando le vittime su un sito Internet sotto il controllo dei pirati...

EVENTI

Cybersecurity Day 2019

11-10-2019 09:00 to 17:00

Officine Garibaldi, Via Vincenzo Gioberti, 39, 56124 Pisa PI

Un evento tutto dedicato alla cybersecurity a cui parteciperanno esperti di settore, ricercatori, rappresentanti del mondo delle imprese. Nel corso della giornata saranno presentate le attività di...

OCS in numbers

- and 5 more coming soon...

→ 5 databases

- Tweets (+1.5M)
- Malware (280K)
- CVE (120K)
- Spam (57K)
- Exploit (41K)

We are looking for collaborations!

Self Assessment Tools

The main goal of the tool is to provide a simple and quick tool for cyber risk self-assessment. The tool requires two types of input: information about security measures and information about key assets of the enterprise. When all inputs are provided, the tool estimates the expected annual losses for every relevant threat and a total one. The output is to be available when the input information is correctly provided.
